RE: G Suite

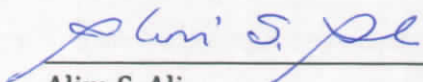

Please be advised that the school has upgraded to G Suite. One of the features of G Suite is an advanced version of Google classroom. This forum is specifically designed for educational institutions and provides many upgrades that allow the school's various classrooms to operate as a unit with many addition advantages. It is also intended to provide a safe space for the teachers and students with greater ease of communication.

Because it is equivalent to an online institution all teachers and students were assigned special emails to allow them access that already links them to the ASJA Boys' G Suite. All subjects and classes will be switching to this forum as of this week. Emails are being sent out to the students with instructions and their new emails and a simple password which they are to change as soon as possible. Their old emails will not be accepted with G Suite. It is expected that all students to be onboard with their G Suite account by 1st October 2020

Please note that the attendance of Google classroom and synchronous sessions are going directly to the ministry's daily attendance role. If for any reason a student is unable to be part of the online classes, they need to let their form teacher know, otherwise it will be noted as absenteeism due to delinquency.

Please attend to your new emails as soon as possible. Teachers will be deactivating the old Google classroom by Tuesday evening, so students are asked to please be sorted and ready for the new week.

Yours in Education,

Alim S. Ali
Principal II
